

experts in lone worker safety

“ Not only does the Peoplesafe lone worker safety device enable our bailiffs to manage their own safety, but in an industry that has a reputation for sometimes being less than scrupulous, the ID badge gives our bailiffs status as it immediately identifies who they are and the purpose for their visit. ”

Simon Melluish
Director of Operations

Peoplesafe offers security for Davies Enforcement

Davies Enforcement was established in 1998 to provide professional and ethical debt collection and recovery services to the public sector and commercial organisations. They are proud to work to a code of conduct that is resolute about the service not just recovery rates.

Davies Enforcement focuses on providing high-calibre management through the intelligent use of new technology.

Peoplesafe

We are one of the leading providers of lone worker safety solutions in the UK. Unlike many of our competitors, we operate independently of any device manufacturer, selecting our proposed solutions based on the needs of each individual lone worker.

case study

Davies Enforcement assessed the needs of their lone workers and decided to ask three of their bailiffs to trial Peoplesafe safety devices.

Peoplesafe were able to offer a range of alternative lone worker safety devices including a device that resembles an ID holder but does in fact contain the latest mobile technology.

The new Identicom device, which can be worn around the neck on a lanyard like a standard ID, enables the wearer to discreetly raise an alarm if threatened and also allows a third party to listen to what is happening and coordinate emergency support if required.

Lone workers trialing the device were particularly pleased to be able to press the device's 'checking in' button when they were entering a potentially hazardous situation. This gave them the reassurance of knowing they were being monitored.

If the wearer then has the cause to press the red alert, lone worker safety experts at the Peoplesafe monitoring centre retrieve the information on their locality, listen to what is happening and co-ordinate the appropriate emergency support – involving the police if necessary.

Simon Melliush, Director of Operations, said: "Our bailiffs feel the benefit of this support and find using the Peoplesafe service reassuring when on duty.

"They have also commented that it provides their families with peace of mind knowing they now have the technology to discreetly summon assistance if faced with a potentially difficult situation."

Following the enormous success of the trial Davies Enforcement decided to provide Peoplesafe safety devices to 38 of their lone workers.

Peoplesafe lone worker safety experts are now available to provide advice and support to the Davies Enforcement team, 24 hours a day, 365 days a year.
