

experts in lone worker safety

“ Employee safety is number one priority for us so we are delighted that the lone worker safety device from Peoplesafe is so effective and simple to use. Our drivers say they now feel they have an extra person looking after them. ”

June Jones
Health and Safety Officer
Wilts Wholesale Electrical

Peoplesafe helps keep overnight delivery drivers safe

Wilts Wholesale Electrical is the largest independent electrical wholesaler in the UK with over 60 branches in Southern England, South Wales and the Midlands.

The company sells a range of electrical products for heating and ventilation, cable management, wiring and lighting.

Peoplesafe

We are one of the leading providers of lone worker safety solutions in the UK. Unlike many of our competitors, we operate independently of any device manufacturer, selecting our proposed solutions based on the needs of each individual lone worker.

case study

Wilts Wholesale Electrical (Wilts) branches place orders during the day and the product is dispatched overnight by delivery drivers operating from the company's central distribution centre.

As a highly responsible employer Wilts were concerned about the vulnerability of its drivers whilst alone at night.

June Jones, Health and Safety Officer at Wilts, "We had an incident when one of our drivers was trapped when his vehicle rolled back on him.

"Although he was able to call us using his mobile phone he was not able to tell us where he was located.

"In another incident a driver was concerned about people hanging around outside one of our depots."

As a result of these concerns Wilts contacted lone worker safety experts Peoplesafe for impartial advice on how to best protect their employees.

After considering the individual needs of Wilts, Peoplesafe supplied Identicom safety devices, which resemble an ID holder but contain the latest mobile technology, on a trial basis.

The new Identicom device, which can be worn around the neck on a lanyard like a standard ID, enables the wearer to discreetly raise an alarm if threatened and also allows a third party to listen to what is happening and coordinate emergency support if required.

The device can also support the pinpointing of a lone workers location using GSM/LBS technology.

As a result of a successful trial the devices have been rolled out to the company's 11 drivers.

In addition to supplying the safety devices and expert support Peoplesafe also deliver a programme of lone worker safety training to the Wilts team.
